INTRODUCTION

SPARSH INTEGRATED ELECTRONIC SECURITY SOLUTIONS (S-IESS)

Who We Are

At Sparsh Integrated Electronic Security Solutions (S-IESS), we are a leading global provider of integrated security solutions. Specializing in the design, installation, maintenance, and monitoring of state-of-the-art electronic security systems, our mission is to safeguard businesses, homes, and institutions with cutting-edge technology tailored to meet the unique needs of each client.

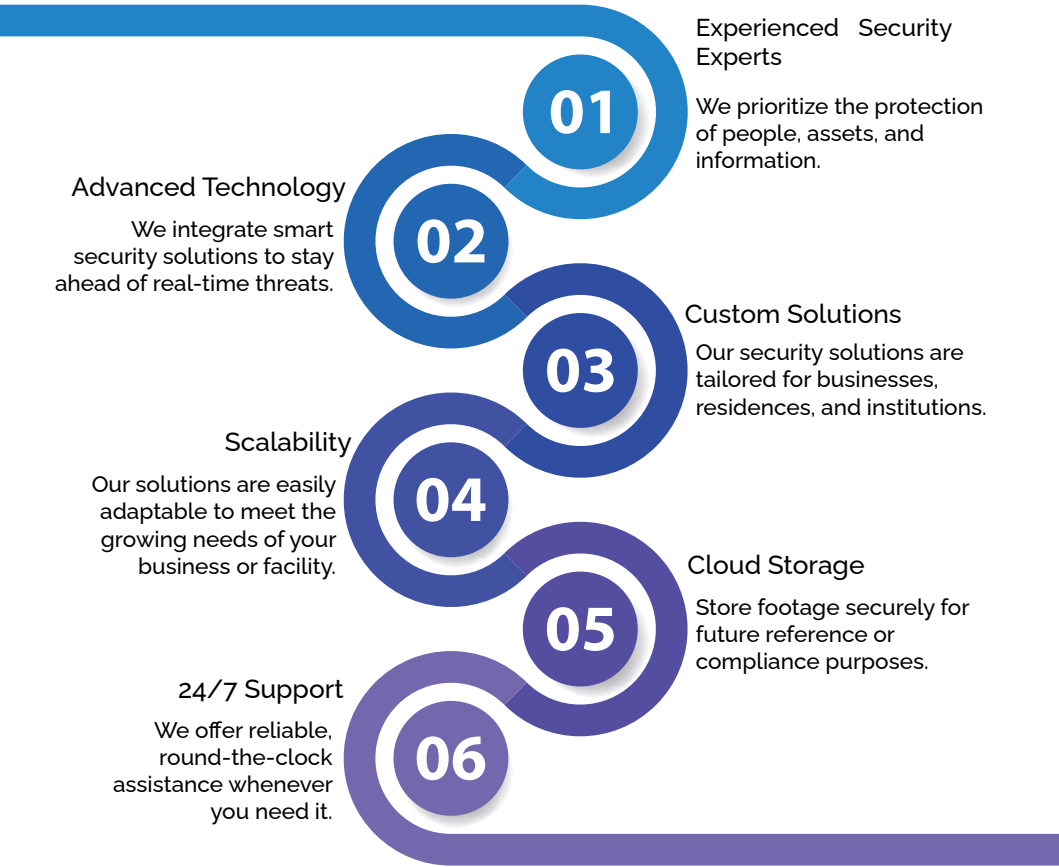

At Sparsh Security Solutions, we combine expertise in both physical and digital security to provide robust protection against evolving threats. Our comprehensive services include sophisticated online security solutions powered by Artificial Intelligence and Advanced Analytics.

Our team of highly trained technicians ensures that your systems operate efficiently and effectively, offering the protection your business requires. We take pride in managing all your security systems, eliminating the need for multiple suppliers. With S-IESS, you can rely on us as your one-stop destination for all your security needs.

Why S-IESS?

At Sparsh Technologies, we don't just provide security systems – we deliver peace of mind through innovation and trust. Whether for enterprises, offices, or homes, our solutions are designed to ensure safety, efficiency, and long-term value.

SURVEILLANCE & MONITORING

- Surveillance Cameras
- Video Management System (VMS)
- Video Surveillance Solutions
- Command Centre

Surveillance Cameras:

Surveillance and monitoring systems are the backbone of modern security solutions, providing constant vigilance and a rapid response to potential threats. These systems typically consist of CCTV cameras, motion detectors, and remote monitoring tools, which enable real-time surveillance and data storage to ensure that no incident goes unnoticed.

Our advanced surveillance systems not only capture high-resolution, crystal-clear footage but also integrate AI-powered analytics to identify unusual behaviors and immediately alert security teams. Whether it's for a business premises, residential community, or public space, our surveillance solutions provide peace of mind by offering proactive protection around the clock.

Key Features

IP Cameras, PTZ Cameras, Varifocal Cameras, AHD Cameras, Night Vision Cameras, Thermal Cameras, Eagle Eye Cameras, etc.

Real-time Monitoring

Monitor your property live, from anywhere, at any time.

Remote Access

Securely view live footage from any device, at your convenience.

Cloud Storage

Safely store footage for future reference or compliance purposes.

Surveillance Cameras

IP Cameras

High-resolution digital surveillance with network connectivity.

PTZ Cameras

Pan, tilt, and zoom functionality for comprehensive coverage.

Varifocal & AHD Cameras

Adjustable lens capabilities with analog high definition options.

Night Vision Cameras

Clear surveillance in low-light and dark conditions.

Thermal Cameras

Heat signature detection for advanced security applications.

Eagle Eye Cameras

Panoramic views with wide field of vision coverage.

Video Management System (VMS):

Sparsh Video Management System (VMS) is a robust software platform that streamlines the management, storage, and viewing of video surveillance footage. Tailored for businesses and organizations of all sizes, a VMS enables users to efficiently monitor and review video feeds from multiple cameras, ensuring comprehensive security and surveillance coverage.

A VMS is crucial for optimizing the effectiveness of surveillance systems, enabling organizations to respond to incidents quickly and safeguard valuable assets.

Centralized Video Storage:

Securely manage and store video footage, with remote access available for authorized users.

Live & Recorded Video Monitoring:

View live streams and recorded footage seamlessly.

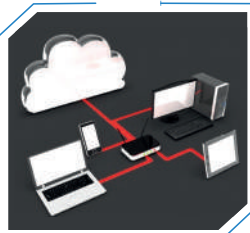

User-Friendly Interface:

Intuitive controls that make it easy to navigate video sources, adjust settings, and manage cameras.

Scalability:

Flexible to accommodate both small installations and large-scale enterprise systems, allowing easy expansion as needed.

Remote Access:

Monitor live video and recordings on a variety of devices, including PCs, tablets, and smartphones, ensuring constant oversight from anywhere.

Video Surveillance Solutions:

At Sparsh Technology Security Solutions, we offer a range of advanced video surveillance solutions tailored to meet your specific security needs. From analog to IP-based systems, our NVR (Network Video Recorder), DVR (Digital Video Recorder), and Hybrid NVR solutions ensure top-notch monitoring and protection for your premises.

NVR (Network Video Recorder):

Our NVR systems are designed for IP-based surveillance, offering superior image quality and flexibility. With NVR, you can capture high-definition video feeds from network cameras and store them digitally on a server or cloud storage. Its key benefits are:

- High-definition video recording (up to 4K)
- Remote access and real-time monitoring
- Scalable storage options
- Easy-to-install and manage
- Seamless integration with IP cameras for enhanced security

DVR (Digital Video Recorder):

For traditional CCTV systems, our DVR units provide reliable and cost-effective video recording. DVRs are compatible with analog cameras, offering local storage for video feeds while maintaining high-quality recordings. Its key benefits are:

- Seamless integration with analog cameras
- 24/7 recording with motion detection
- Easy playback and search features
- Affordable solution for smaller-scale security setups
- Simple installation and setup for conventional systems

Hybrid NVR:

For organizations seeking the flexibility to use both analog and IP cameras, our Hybrid NVR systems provide the best of both worlds. This solution allows you to connect both analog and IP cameras, offering a future-proof solution that can evolve as your security needs grow. Its key features are:

- Supports both IP and analog cameras
- Centralized management for different camera types
- Scalable to meet growing security demands
- Flexible storage options (on-premise or cloud)
- Easy upgrades for modernizing security infrastructure

With our NVR, DVR, and Hybrid NVR solutions, Sparsh Technology Security Solutions ensures that your security system is perfectly tailored to meet the unique demands of your property or business. Whether you are looking for high-definition IP surveillance or a traditional CCTV setup, we provide flexible, scalable, and cost-effective solutions to keep your premises safe.

Command Centre:

Our Command Centre Solution integrates data from across your enterprise, enhancing collaboration, improving productivity, and streamlining incident response. By connecting Network Video Recorders (NVRs), cameras, and other key security components into a single unified platform, we offer a comprehensive view of your entire security infrastructure.

This centralized approach ensures all security data—from cameras and sensors to alarm systems—is readily available in real time. Whether you are monitoring surveillance footage or addressing an incident, our Command Centre empowers your security team to make informed decisions quickly and efficiently. The seamless integration boosts visibility, improves coordination, and accelerates response times, creating a safer environment for your business and stakeholders.

This centralized approach ensures all security data—from cameras and sensors to alarm systems—is readily available in real time. Whether you are monitoring surveillance footage or addressing an incident, our Command Centre empowers your security team to make informed decisions quickly and efficiently. The seamless integration boosts visibility, improves coordination, and accelerates response times, creating a safer environment for your business and stakeholders.

ACCESS CONTROL SYSTEMS

At Sparsh Security Solutions, we help you protect what matters most with the power of biometric access control, enhancing both security and convenience for your workplace.

- Biometric Access Control System
- RFID Security Solutions
- Visitor Management System

Biometric Access Control System:

Our Biometric Access Control System offers a highly secure and efficient method for managing access to your premises. By leveraging advanced biometric technology, such as fingerprint recognition, facial recognition, and retina scans, we ensure that only authorized individuals can access sensitive areas and track and monitor who is entering and exiting secured areas.

Our customized solutions ensure that your property, personnel, and assets are always secure, while providing the flexibility to adjust access rights as needed.

Fingerprints

Facial Recognition

Voice Recognition

Iris Recognition

RFID Security Solutions:

We offer RFID-based security solutions designed to enhance access control, asset tracking, and inventory management. RFID (Radio Frequency Identification) technology allows seamless and secure identification, ensuring that only authorized individuals can access restricted areas while also offering robust solutions for tracking assets and inventory in real-time. Our RFID systems provide:

Access Control

Streamlined entry and exit with secure RFID-enabled badges or cards, reducing the risk of unauthorized access

Asset Tracking

Monitor valuable assets and equipment with high accuracy, ensuring better management and reducing loss.

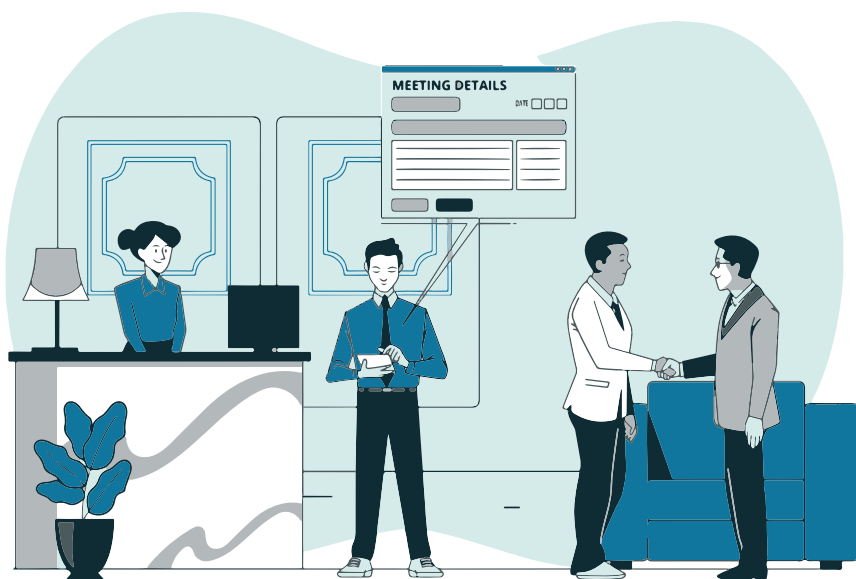

Inventory Management

Improve the efficiency and accuracy of inventory with real-time updates and automated stock tracking.

Whether for businesses, industrial facilities, or residential complexes, our RFID security solutions offer unmatched reliability and flexibility, enabling smooth operations and enhanced security. Trust S-IHSS to bring advanced RFID technology to safeguard what matters most.

Visitor Management System:

Our Visitor Management System is designed to enhance security and simplify visitor access across your facility. By offering seamless check-ins, real-time tracking, and secure authentication, it provides a streamlined experience for both visitors and staff. Whether you're managing a corporate office, industrial facility, or a high-security zone, our system ensures that all visitors are verified and monitored, creating a safe and efficient environment. With features like automated notifications, customizable workflows, and compliance-ready processes, our Visitor Management System helps you maintain a professional, secure, and compliant operation at all times.

NETWORKING SOLUTIONS

PASSIVE UTP NETWORKING SERVICES:

Reliable, Cost-Effective Networking for Your Business

PASSIVE UTP NETWORKING SERVICES

At Sparsh IESS, we specialize in providing high-quality Passive UTP Networking Solutions tailored to meet the connectivity needs of your business. Our expert team ensures efficient installation, management, and maintenance of Unshielded Twisted Pair (UTP) cabling for reliable data transmission.

We offer end-to-end services, from network design and installation to performance testing and ongoing support. Whether you need a simple office setup or a large-scale network, we ensure scalability and cost-efficiency without compromising on performance. Our solutions include Cat 5e, Cat 6, and Cat 6a cables, providing flexibility for your network's growth.

With our 24/7 support, we ensure your network runs smoothly, minimizing downtime and improving operational efficiency. Choose us for reliable, affordable, and scalable Passive UTP networking solutions that keep your business connected.

WIRELESS ACCESS POINT (WAP) SOLUTIONS

WIRELESS ACCESS POINT SOLUTIONS

At Sparsh IESS, we provide Wireless Access Point (WAP) services to ensure seamless and reliable wireless connectivity for your business. Our expert team designs, installs, and configures WAP solutions that meet your specific needs, whether for small offices, large enterprises, or public spaces.

We offer a range of high-performance access points that provide secure, high-speed Wi-Fi coverage throughout your premises. Our services include site surveys to determine optimal placement, installation of WAPs, network configuration, and ongoing support to ensure consistent connectivity.

With our WAP solutions, you can enjoy enhanced coverage, minimal interference, and support for multiple devices, making it ideal for businesses with high network demands. Whether you need to extend coverage in specific areas or deploy a robust, scalable wireless network, we provide the expertise to optimize your wireless experience.

HCM CAFE

HCM Café by Sparsh Technologies is a next-generation Human Capital Management (HCM) platform designed to simplify HR processes, enhance employee experiences, and empower businesses with data-driven insights.

Key Features of HCM Café:

- **Seamless HR Automation** – From hiring to retirement, streamline every HR function with ease.
- **AI-Powered Analytics** – Make informed decisions with real-time workforce insights.
- **Employee Self-Service** – Enable employees to manage their profiles, leaves, and benefits effortlessly.
- **Integrated Payroll & Compliance** – Ensure accurate payroll processing and regulatory adherence.
- **Engagement & Performance** – Drive productivity through continuous feedback and recognition.

With HCM Café, organizations can transform their HR operations, reduce administrative burdens, and create a future-ready workforce. Experience the future of HR with Sparsh Technologies.
